## SKILLS

**Languages:** Dart, Java, Kotlin, Swift, C++, JavaScript, TypeScript, Python, SQL

**Frameworks:** Flutter, React Native, Vue.js

**Technologies & Tools:** Git, Firebase, SQLite, Hive, Figma, Web Socket, Crash Monitoring, Azure Cloud, Pipelines, Google Maps, Android Studio, Xcode, Mobile Analytics

**Architecture & Practices:** Clean Architecture, MVC, SOLID Principles, Object-Oriented Programming, Dependency Injection, Scrum, Unit Testing, Responsive Design, Restful APIs, Mobile Security, Mobile Performance, Flutter Widgets, Flutter Packages

## WORK EXPERIENCE

### FikraTech

Mobile Developer

Apr 2025 - Present

Dubai, United Arab Emirates

- Enhanced and maintained e-wallet mobile applications for Android and iOS, boosting daily active users by **15%**.
- Contributed to a major app redesign, introducing new features that improved app performance by **30%**.
- Implemented security algorithms to enhance wallet data protection and transaction safety.
- Collaborated in a Scrum team using Azure DevOps to manage sprints and CI/CD pipelines, cutting deployment times by **40%**.

### Rand Service Provider

Mobile Specialist Engineer

Jun 2024 - Oct 2025

Damascus, Syria

- Key contributor to Doremi app development, launching features that **doubled** the user base in **6 months**.
- Converted native Android code to Flutter, enabling cross-platform support and reducing development time by **50%**.
- Optimized app performance and introduced monetization features, increasing app earnings by **70%**.

### Doodles Agency

Mobile Application Developer

May 2023 - May 2024

Dubai, United Arab Emirates

- Built Flutter apps such as Taverna, increasing vendor engagement by **30%** and reaching **5,000+** users.
- Managed and maintained app state using Bloc and GetX, reducing crashes by **20%**.

## PROJECTS

### QuickSale

Mobile Developer

Mar 2025 - Nov 2025

- Built a product marketplace app supporting rich ad postings (images, videos, categories, pricing, and geo-location), with features like account-to-store conversion, direct chat (text & voice), and social media sharing, attracting 300+ ads within launch month.

### TruckLink

Frontend and Mobile Developer

Oct 2024 - Present

- Built a logistics marketplace with shipment posting, real-time Google Maps tracking, and shipping company features including account verification, offer management, trip creation, and revenue tracking.
- Applied driver workflow with live tracking, order updates, and invoice generation, and designed an admin dashboard for approvals, complaints, and analytics.

## EDUCATION

### Faculty of Information Technology Engineering | Damascus University

Bachelor of Software Engineering

Oct 2020 - Oct 2025

## CERTIFICATIONS

### CS50x certificate | Harvard University

Completed a comprehensive course covering algorithms, data structures, web development, and C, Python, SQL, and JavaScript.

### Deep Dive into Clean Architecture in Flutter | Udemy

Learned to structure Flutter apps with scalable, testable, and maintainable architecture using clean principles.
